EDUCATION HISTORY

Post-Graduation

Course	MCA
College	RD Engineering College
Year of Passing	2024
Grade	78%

WORK EXPERIENCE

Python Developer

Technical Trends 05/2023 – 04/2024

- Enhanced functionality and usability of trading software by developing and integrating a new module into both desktop and web application.

- Leveraged PYQT5 and Django framework ,web-api to ensure seamless and integration and improved user experience.

Data Analyst

Startek 12/2021 – 01/2023

- Spearheaded continuous monitoring of Airtel Money transactions to detect and prevent suspicious or fraudulent activity, leveraging SQL for data extraction and Excel for analysis.

- Developed and implemented criteria to identify potential fraud indicator, such as unusual transaction pattern and large amounts, resulting in a significant reduction in fraudulent transaction.

PROJECTS

College Registration Portal.

This project is to develop a web-based Student Mgmt. System using Django and PostgreSQL. This system will allow authorized users to perform CRUD operations on student records and user authentication for secure access.

Email Sender Application.

This project is to develop a web-based application using the Django framework that allows users to compose and send emails through the application.

AWS Website Hosting and Deployment.

This project that combines (AWS) services such as S3,EC2, and Dynamo DB is to develop a web-based file sharing and storage system utilizing AWS services for efficient, scalable, and reliable storage and processing.
